

## Project Description

Construction Work Plan for Navarro County Electric Cooperative, Inc.:

This Study was prepared in accordance with the Rural Electrification Administration guidelines. The Navarro 5 year Work Plan recommended system improvement investment that amounted to \$12,361,619 over a period of four years; this investment was necessary in order for Navarro County Electric Cooperative to continue providing adequate electric service to its customers. The investment was in the form of line/substation upgrades and new construction. The distribution system of the study served 13,246 customers from 22 Substations and Metering points, and over 2,300 miles of distribution line, with a total peak demand of approximately 79 Megawatts.

## Other similar Work Plans of comparable magnitude were completed for the following clients:

- Bartlett Electric Cooperative, Inc, Bartlett, Texas.
- McLennan County Electric Cooperative, Inc, McGregor, Texas.
- Wise Electric Cooperative, Inc, Decatur, Texas.
